
On World No Tobacco Day 'Get ready for plain packaging'

The diagram shows a 3D perspective of a cigarette pack with several callouts pointing to specific areas:

- No logos, colours, brand images or promotional information:** Points to the top flap of the pack, which is labeled "Brand" in a small font.
- Pack surfaces in a standard colour:** Points to the side of the pack, which is a solid olive green color.
- Brand and product names in a standard colour and font:** Points to the front of the pack, which is labeled "Brand Variant" in a white sans-serif font.
- Graphic health warnings used in conjunction with plain packaging:** Points to a large graphic on the front of the pack. The graphic has a black background with the text "SMOKING HARMS UNBORN BABIES" in large, white, bold, sans-serif capital letters. Below the text is a photograph of a newborn baby lying in a hospital bed, with a hand gently holding the baby's head. The baby has medical sensors attached to their chest and arm.

Additional details on the pack include:

- A barcode on the side of the pack.
- Text on the side of the pack: "Tobacco Company Name", "Country of Origin", "Salem, Massachusetts", "Phone: 1 800 400 1000", and "ALPHANUMERIC CODE".
- A small number "25" in the bottom right corner of the front panel.

- Reduce attractiveness of tobacco packaging
- Eliminate tobacco advertising and promotion
- Limit deceptive tobacco packaging
- Increase effectiveness of tobacco health warnings

GET READY FOR PLAIN PACKAGING

GET READY FOR PLAIN PACKAGING

Idioma Inglés

31 May is World No Tobacco Day, the theme of which this year focuses on “plain (standardized) packaging” of tobacco products, which was first introduced by Australia in 2012 and as is being implemented in the UK and France, with other countries moving in the same direction.

Plain packaging of tobacco products restricts or prohibits use of logos, colours, brand images and promotional information. Plain packaging is part of a integrated approach to tobacco control that includes comprehensive bans on tobacco advertising, promotion and sponsorship and other packaging and labelling measures, such as large graphic health warnings.

Globalization of plain packaging is underway as governments around the world seek to embrace this measure. Tobacco companies have fought plain packaging with a massive misinformation campaign since as far back as 1993.

Today, the World Health Organization (WHO) is calling on its Member States to get ready for plain packaging. Australia, United Kingdom, France and Ireland have passed laws to implement plain packaging, and other countries are considering the same. The tobacco industry has filed suits against several countries to stop plain packaging, but without success, most recently in the UK.

At the World No Tobacco Day event held today in Oslo, the Norwegian Minister of Health and Care Services, Bent Høie, has announced that Norway will soon introduce plain packaging.
