

Check out NCD Programme at World Cancer Congress

Idioma Inglés

This year again, the World Cancer Congress will bring together leading experts across NCDs, providing an ideal setting for collaboration and exchange of lessons learned across diseases.

A comprehensive NCD programme has been designed to complement the overall Congress programme and enable delegates to derive maximum benefit while in Paris.

Supporters of the NCD Alliance have organised a series of highly interactive sessions that will also take place in the traditional NCD Café, to reinforce the dialogue around prevention, strategies and patient-centered approaches to managing chronic conditions and their risk factors.

Find out all the NCD sessions in the 2016 WCC Programme via the links below.
