The NCD Alliance is working on a policy brief on digital health, drawing upon the recommendations of [The Promise of Digital Health: Addressing Non-communicable Diseases to Accelerate Universal Health Coverage in LMICs](#) [1] recently developed by The Broadband Commission Working Group on Digital Health.

The brief will **stress the need for the meaningful involvement of civil society** to bridge global policy to national advocacy and action for eHealth and NCDs.

The **recommendations for civil society action** will be a key feature of the report – [this short survey](#) [2] has been designed to learn your thoughts and positions on the role of civil society in digital health, and will help us highlight ways for civil society specifically to harness the full power of digital health technologies for NCDs, in pursuit of universal health coverage.

Deadline to participate: **Friday 18 May**
