

Joint brief: The link between food, nutrition, diet and NCDs

Language English

© Asian Development Bank, Flickr. Farmers selling their produce of fresh vegetables at Moc Market, Bac Giang Province, Viet Nam.

[World Cancer Research Fund International](#) [1] and The NCD Alliance have published a joint brief about why non-communicable diseases should be considered in policies to address major nutritional challenges.

We summarise the state of the art science on the connection between nutrition and NCDs, and make recommendations for priority actions by governments, civil society organisations, researchers, donors, research funders, and international health, food and development agencies.
