The World Congress of Cardiology and Cardiovascular Health, held last week in Mexico City, was very successful for NCDs, with links being drawn from CVD to the broader NCD agenda from start to finish.

NCD Alliance team had a strong presence at the congress, with numerous sessions highlighting NCD-related issues, and dynamic, interactive discussions at the [NCD Café](#) [1], organised by NCD Alliance supporters.

Over 20 of the world's leading health organisations, including NCD Alliance, signed [The Mexico Declaration on Circulatory Health](#) [2] – the most comprehensive global declaration for the prevention of heart disease and stroke.
