Extended Description:

There are four main objectives of the NCD Diaries:

1. Amplify the voices and lived experiences of people living with NCDs.
2. Support and inspire people living with NCDs to share their lived experiences.
3. Provide a repository of documented lived experience.
4. Contextualise the Advocacy Agenda of People Living with NCDs.

This report evaluates the project's success in meeting the four objectives, with summaries of outputs, an evaluation of the impact of the NCD Diaries on the advocates, and perceptions of the project across the wider organisation, followed by key recommendations to help guide future series.
