## **Policy Research Report - From Siloes to Synergies: Integrating noncommunicable disease prevention and care into global health initiatives and universal health coverage**

Policy Research Report - From Siloes to Synergies: Integrating noncommunicable disease prevention and care into global health initiatives and universal health coverage

Language English

Through analyses of data from an online survey, interviews, and a targeted literature review, this report brokers knowledge by showcasing examples of where global health financing mechanisms have supported the provision of cost-effective NCD prevention and care services, and in so doing, supported progress towards UHC. It demonstrates that there are ways to effectively support NCD service provision through global health programming and that these will differ in different contexts.

Analysis, Commentary & Opinion
